

## **Enterhost Extends SmarterTools Bundle Offer**

([The Hosting News](#)) – Enterhost, a Microsoft Gold Certified Partner and leading provider of Windows-only web hosting, announced today the SmarterBundle from SmarterTools will be available on its upcoming cloud server product offering.

“Our dedicated server clients have been benefiting from our partnership with SmarterTools now for six years,” said Enterhost President Kevin R. Valadez. “As we prepare for the future release of our cloud server product, we wanted to ensure our relationship with SmarterTools was extended for the launch of our new dynamic hosting platform.”

The software bundle includes SmarterMail 7.x, an award-winning, Exchange-level mail server; SmarterStats 5.x, a comprehensive Web log analytics and SEO application; and SmarterTrack 5.x, a powerful help desk application built for customer service departments.

As a result of the renewed partnership, every client that purchases a dedicated or cloud server from Enterhost will automatically receive all three applications at no additional charge. The software package has an \$800 value.

SmarterMail 7.x features a redesigned webmail interface and improved search functionality. Additional new features include free-busy scheduler and availability checking, CalDAV and CardDAV support, linked tasks and auto-saved email addresses.

SmarterStats 5.x gives users comprehensive Web log analytics with search engine optimization (SEO) reports and campaigns, keyword and competitor suggestion tool, server activity reports, improved mobile phone detection and reporting, and more.

SmarterTrack 5.x now features a mobile interface to provide managers with helpdesk activity via mobile phones. Additional enhancements include call logging, task management, follow-up tracking and improved functionality with live chats.
